

EXCLUSIVE BUILD

## EXB Exclusive Build

- EXB "Exclusive Build" is an Exhibition service provider, with an in-house production facility, that strives to deliver the best possible results that meet with both clients' expectations and budgets.
- EXB's team is a fine combination of skilled carpenters and workers, with professional project management, and a touch of design, all put together in an architectural layout, and setup to serve our clients to the best of standards

## Our Clients are:

- Design houses that are seeking quality production, with engineering back-up that makes sure all design details are attended to, and that the final delivered product is representing the desired design concept.
  - Exhibitors / tenants who need us to be involved from the minute they have booked their space, and expect us to digest the design brief, and brain storm to come up with a creative "design and build" proposal, aiming to deliver the best combination of an attractive FORM, correct FUNCTION, and within the reasonable FINANCIAL budgets.
